

# Source LDPATH working with Cork Coroners

A leading cellular pathology service delivering comprehensive end-to-end histopathology solutions, including digital pathology. A leading cellular pathology service delivering comprehensive end-to-end histopathology solutions, including digital pathology.

## Partnership between Cork Coroners and Source LDPATH Wets-to-Slide Service

1. Cork Coroners select the tissue for processing and send cassette sized pieces to Source LDPATH laboratory.
2. Upon receipt, the cases are booked in individually, handled by Biomedical Scientists in dissection and sent for tissue processing.
3. Embedding, microtomy, staining and quality control all occurs the day after processing.
4. Regular meetings between Source LDPATH customer support and the Coroners team ensure good communication and facilitate smooth working relationships.
5. All slides and blocks are returned to the customer for interpretation
6. Further testing (e.g. IHC, FISH, Lynch Syndrome, Molecular testing) also available if required.
