

Sustainability Strategy

About Us

Source BioScience delivers industry-leading laboratory services in Genomics and Histopathology, partnering with organisations across biotechnology, pharmaceuticals, healthcare, and academia. As the company grows, Source BioScience is advancing its environmental, social, and governance (ESG) agenda through a range of live initiatives and long-term plans. We recently launched OnHand to empower employees to engage in environmental and social causes, rewarding top contributors through initiatives like our "Source BioScience Forest." We are also proud to hold EcoVadis certification and are actively focusing on renewable energy, water usage, and long-term sustainability planning.

Our Green Credentials

✓ UK Based Laboratories

Source BioScience is a leading UK laboratory service provider with sites in Cambridge, Chichester, and Nottingham, processing samples locally.

✓ Charging Forward Sustainably

EV charging is available at all Source BioScience laboratory locations, supporting greener travel for staff and visitors.

✓ EcoVadis Sustainability Rating

Awarded a Committed Badge by EcoVadis, this recognition highlights strong performance under the EcoVadis assessment criteria.

✓ Carbon Capture® Programme

Active participation in the Carbon Capture program helps offset emissions and reduce environmental impact.

✓ Carbon-neutral Nottingham (CN28)

By supporting Nottingham's CN28 ambition, Source BioScience shows its commitment to achieving a carbon-neutral future by 2028.
