

With over 20 years' experience, Source Genomics delivers fast, reliable sequencing, expert support and exceptional service, all while reducing our environmental impact through sustainable practices.

## Why Source Genomics?

- **Overnight results**  
Rapid Sanger sequencing for PCR products and plasmids, data back by 9am\*
- **Free sample submission**  
Courier network or Freepost service
- **Direct laboratory access**  
Troubleshooting and repeats with our team
- **Excellent support**  
Help every step of the way
- **Flexible accounts**  
Individual or group setup
- **Paperless pre-paid eVouchers**  
VAT-free with valid exemption cert
- **Eco-friendly commitment**  
Go green with your samples

\*Available where a collection box is in place

## Services:

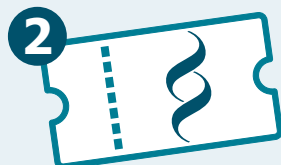

- **Sanger sequencing**
  - Free repeats and/or dGTP for difficult templates
  - Add-on template amplification and/or PCR clean up
- **Oxford Nanopore Technology for whole plasmid sequencing**  
Add-on rolling-circle amplification
- **Colony PCR**
- **Microsatellite genotyping**
- **Primer synthesis**  
Stored at our laboratory for your use

## Additional services include:

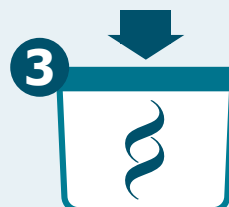

- Whole Genome Sequencing
- RNA Sequencing
- Proteomics
- Bioinformatics
- Metagenomics
- Targeted Sequencing
- Amplicon Sequencing and Large Construct Sequencing
- Digital PCR
